1. Nature of operations and going concern

Chilean Metals Inc. (the "Company") is a mining exploration company and is in the business of acquiring and exploring mineral properties in Chile and Nova Scotia. There has been no determination whether properties held contain ore reserves, which are economically recoverable.

The Company is a publicly listed company incorporated in Canada with limited liability under the legislation of the Province of British Columbia. The Company's shares are listed on the TSX Venture Exchange ("TSX-V"), OTCQB and Santiago Stock Exchange, Venture Market. The head office and principal address of the Company are located at the Canadian Venture Building, 82 Richmond Street East, Suite 202, Toronto, Ontario, M5C 1P1. The Company's registered and records office address is at Suite 700 – 595 Burrard Street, PO Box 49290, Vancouver, British Columbia, Canada, V7X 1S8.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements. The Company's property interests may also be subject to increases in taxes and royalties, renegotiation of contracts, and political uncertainty.

These unaudited condensed consolidated interim financial statements have been prepared on the going concern basis, which assumes that the Company will be able to continue as a going concern and realize its assets and discharge its liabilities in the normal course of business. These unaudited condensed consolidated interim financial statements do not reflect any adjustments that may be necessary if the Company is unable to continue as a going concern. During the three months ended March 31, 2019, the Company incurred a net loss of $217,703 (three months ended March 31, 2018 - $573,597). As at March 31, 2019, the Company has incurred significant losses since inception totaling $62,815,964 (December 31, 2018 - $62,569,941). As at March 31, 2019, the Company has a working capital deficiency of $1,631,352 (December 31, 2018 - $1,413,964); the continuing operations of the Company are dependent on its ability to generate future cash flows or obtain additional financing. Management is of the opinion that additional funds will be obtained from external financing to meet the Company's liabilities and commitments as they become due, although there is a risk that additional financing will not be available on a timely basis or on terms acceptable to the Company. These factors indicate the existence of a material uncertainty that may cast significant doubt as to the Company's ability to continue as a going concern and accordingly use accounting principles applicable to a going concern.

2. Basis of presentation

These unaudited condensed consolidated interim financial statements for the three months ended March 31, 2019, including comparatives, have been prepared in accordance with International Accounting Standard 34, 'Interim Financial Reporting'. These unaudited condensed consolidated interim financial statements may not include all information and note disclosures required by IFRS for annual financial statements and therefore, should be read in conjunction with the annual audited financial statements for the year ended December 31, 2018, which have been prepared in accordance with IFRS.

These unaudited condensed consolidated interim financial statements for the three months ended March 31, 2019 were approved and authorized for issue by the Company's Board of Directors on May 29, 2019.

These unaudited condensed consolidated interim financial statements have been prepared on a going concern basis under the historical cost convention, except for the revaluation of certain financial instruments. In addition, these unaudited condensed consolidated interim financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

3. Significant accounting policies

The policies applied in these unaudited condensed consolidated interim financial statements are based on IFRSs issued and outstanding as of May 29, 2019, the date the Board of Directors approved the statements. The same accounting policies and methods of computation are followed in these unaudited condensed consolidated interim financial statements as compared with the most recent annual consolidated financial statements as at and for the year ended December 31, 2018, except as noted below. Any subsequent changes to IFRS that are given effect in the Company's annual consolidated financial statements for the year ending December 31, 2019 could result in restatement of these unaudited condensed consolidated interim financial statements.

New standards adopted

(a) Leases and right-of-use assets

In January 2016, the IASB issued IFRS 16 - Leases ("IFRS 16"), replacing IAS 17 - Leases. IFRS 16 provides a single lessee accounting model and requires the lessee to recognize assets and liabilities for all leases on its statement of financial position, providing the reader with greater transparency of an entity's lease obligations.

At January 1, 2019, the Company adopted the following and there was no material impact on the Company's financial statements. The Company adopted IFRS 16 using the modified retrospective approach and accordingly the information presented for 2018 has not been restated. It remains as previously reported under IAS 17 and related interpretations.

All leases are accounted for by recognising a right-of-use asset and a lease liability except for:

- Leases of low value assets; and
- Leases with a duration of twelve months or less.

Lease liabilities are measured at the present value of the contractual payments due to the lessor over the lease term, with the discount rate determined by the incremental borrowing rate on commencement of the lease is used. Variable lease payments are only included in the measurement of the lease liability if they depend on an index or rate. In such cases, the initial measurement of the lease liability assumes the variable element will remain unchanged throughout the lease term. Other variable lease payments are expensed in the period to which they relate.

On initial recognition, the carrying value of the lease liability also includes:

- Amounts expected to be payable under any residual value guarantee;
- The exercise price of any purchase option granted if it is reasonable certain to assess that option;

Any penalties payable for terminating the lease, if the term of the lease has been estimated on the basis of termination option being exercised.Right-of-use assets are initially measured at the amount of the lease liability, reduced for any lease incentives received, and increased for:

- Lease payments made at or before commencement of the lease;
- Initial direct costs incurred; and
- The amount of any provision recognised where the Company is contractually required to dismantle, remove or restore the leased asset.

Lease liabilities, on initial measurement, increase as a result of interest charged at a constant rate on the balance outstanding and are reduced for lease payments made.

Right-of-use assets are amortised on a straight-line basis over the remaining term of the lease or over the remaining economic life of the asset if this is judged to be shorter than the lease term.

(Expressed in Canadian Dollars)

3. Significant accounting policies (continued)

New standards adopted (continued)

When the Company revises its estimate of the term of any lease, it adjusts the carrying amount of the lease liability to reflect the payments to make over the revised term, which are discounted at the same discount rate that applied on lease commencement. The carrying value of lease liabilities is similarly revised when the variable element of future lease payments dependent on a rate or index is revised. In both cases an equivalent adjustment is made to the carrying value of the right-of-use asset, with the revised carrying amount being amortised over the remaining (revised) lease term.

The Company adopted this standard and there was no material impact on the Company's unaudited condensed interim consolidated financial statements.

6. Debentures and loans

(a) On August 24, 2018, the Company issued $250,000 of secured debentures with a maturity of August 25, 2019 to a shareholder of the Company. The debenture bears interest at 14% per annum payable up front, $35,000 was paid as of December 31, 2018. In addition, a finance cost of $15,000 was paid as of March 31, 2019.

The Company valued the debt component of the debentures by calculating the present value of the principal and interest, discounted at a rate of 23%, being management's best estimate of the rate of a debenture with an arm's length creditor with similar terms. Based on this calculation, the liability component is $232,072 ($215,686 net of transaction costs).

(b) On December 3, 2018, the Company issued $206,250 secured debentures with a maturity of December 3, 2019; of which $181,250 are held by one officer, one shareholder, and one non-shareholder of the Company. The debentures bear interest at 14% per annum payable up front, $28,875 was paid as of December 31, 2018. In addition, a finance cost of $12,375 was paid as of March 31, 2019.

The Company valued the debt component of the debentures by calculating the present value of the principal and interest, discounted at a rate of 30%, being management's best estimate of the rate of a debenture with an arm's length creditor with similar terms. Based on this calculation, the liability component is $174,946 ($170,323 net of transaction costs).

All debentures were held with shareholders of the Company.

The debentures are secured against all assets of the Company.

(Expressed in Canadian Dollars)

7. Other liabilities

During the year ended December 31, 2017, the Company transferred $69,554 of accounts payable (the "Statute-barred Claims") to non-current liabilities on the basis that any claims in respect of the Statute-barred Claims were statute-barred under the Limitations Act (British Columbia). The Statute-barred Claims related to expenses billed by and third party liabilities incurred prior to December 2015. However, for accounting purposes under IFRS, a debt can only be removed from the Company's statement of financial position when it is extinguished meaning only when the contract is discharged or canceled or expires. The effect of the Limitations Act is to prevent a creditor from enforcing an obligation but it does not formally extinguish the debt for accounting purposes. It is the position of management of the Company that the Statute-barred Claims cannot be enforced by the creditors, do not create any obligation for the Company to pay out any cash and do not affect the financial or working capital position of the Company. The Statute-barred Claims are required to be reflected on the Company's statement of financial position as a result of the current interpretation of IFRS, but they are classified as long-term liabilities since the Company has no intention or obligation to pay these Statute-barred Claims and the creditors cannot enforce payment of the Statute-barred Claims. While inclusion of these items is intended solely to comply with the requirements of IFRS, the Company in no way acknowledges any of the Statute-barred Claims.

8. Issued capital

On May 18, 2018, the Company completed the share consolidation of its issued and outstanding common shares on the basis of one post-consolidation common share for every four pre-consolidation common shares. All applicable references to the number of shares, warrants and options, strike price and per share information has been restated to reflect the effect of the share consolidation, unless otherwise noted.

a) Authorized share capital

At March 31, 2019, the authorized share capital consisted of an unlimited number of common shares, non-voting Class A preference shares with a par value of $4.00 and Class B preference shares with a par value of $20.00. The common shares do not have a par value.

b) Common shares issued

	Number of common shares	Amount

(Expressed in Canadian Dollars)

9. Stock options

The Company has implemented a stock option plan ("the Plan") to be administered by the Board of Directors. Pursuant to the Plan the Board of Director's has discretion to grant options for up to a maximum of 10% of the issued and outstanding common shares of the Company at the date the options are granted. The option price under each option shall be not less than the discounted market price on the grant date. The expiry date of an option shall be set by the Board of Directors at the time the option is awarded, and shall not be more than ten years after the grant date. Options granted to directors, employees and consultants, other than consultants engaged in investor relations activities, will vest immediately upon granting, unless otherwise approved by the relevant regulatory authorities. Options granted to employees and consultants engaged in investor relations activities will vest in stages over a minimum period of 12 months with no more than one-quarter of the options vesting in any three-month period.

The following table reflects the continuity of stock options for the periods presented:
